

StrenuMed® Inc. is an innovative medical products manufacturing company that incorporates the expertise of design, engineering, and marketing into the products it develops.

The company was founded to manufacture and distribute orthopedic surgical accessories, such as battery packs, chargers and testers. We have expanded to offer product development expertise. StrenuMed has designed numerous unique, patented products for corporations and individuals.

Our areas of experience in the medical industry include:

- Orthopedic Surgery
- Neurosurgery
- Oral/Maxillofacial Surgery
- Plastic & Reconstructive Surgery
- Spinal Surgery
- General Surgery
- Podiatry

Electronics

StrenuMed offers medical grade replacement electronics for your power surgical handpiece. These include motor control modules and electronic components for large and small bone cordless instruments. Electronic products can be purchased as easy-to-install units or can be factory installed. Each module is designed to withstand hundreds of sterilization cycles.

Motor Development

The Motor Development team specializes in small motors that fit into surgical handpieces. These high performance motors provide the power and quality necessary to meet the most demanding medical applications.

StrenuMed specializes in:

- Brushless-3 phase motor development
- Motor Testing
- Motor Fabrication and winding
- Medical performance testing and function.

Battery Packs

StrenuMed offers a variety of battery packs for your power surgical instruments. STR-2000, STR-3000, STR-4000 and STR-5000 battery packs will easily operate Stryker System 2000, 4000 and 5000 surgical instruments. We also repair many different types of the power surgical batteries.

StrenuMed offers an array of products and services for hospitals, medical centers, clinics and repair facilities.
